Artist / Design Statement

I feel my purpose in life is to help others with my creative talents. Thankful that I have the ability, talent, and skill to create, as well as the education I have received to improve upon my skills and knowledge base, I thrive behind the scenes designing on a computer or behind the lens of a camera.

My designs are visually clean and simplistic. I strive to be help others see their vision through my art and therefore work best with a design brief. My design process is consultation and research-based.

As a freelance photographer, I enjoy working with a client to help them capture their special moments. My photography process involves researching posing ideas, shot angles, lighting, and location scouting. After a session, I spend hours editing the photos to create a style that best captures the moment.

My preferred medium is a digital platform. I am well versed in most of the Adobe Creative Cloud, and my choice of camera is a Canon, model T6, DSLR. My artistic aesthetic is cohesiveness, similarity, unity, and repetition in my work process.

I will always be grateful that I have a creative eye, and extremely glad I get to spend the rest of my life helping others with my gift.
